

Country Yoghurt Manufacturing & Distribution Management System

Software Requirements & Functional Documentation

This document outlines the proposed software workflow, user roles, permissions, inventory management process, pricing structure, notifications, and accountability features for Country Yoghurt Manufacturing Company.

1. Updated User Hierarchy

- Super Admin (Full Access)
- General Managers – with view-only oversight access
- Production Manager
- Store Manager
- Distributors/Customers

2. Super Admin Functions

- Create and manage managers and distributors.
- Create and manage product list (all products manufactured by the company).
- Assign product pricing and distributor discounts.
- View all inventory, stock movement, dispatch history, deleted inventory logs, and reports.
- View outstanding balances and financial information.
- Manage permissions and notifications.
- Delete or clear inventory (with accountability process).

3. General Manager Role

The system shall include General Managers. Their role is oversight and monitoring only.

- Can view dashboards and reports.
- Can view inventory movement.
- Can view dispatch activities.
- Can view distributor information.
- Can receive notifications.
- Can monitor operations like the Super Admin.

General Manager Restrictions

- Cannot create accounts.
- Cannot create managers or distributors.
- Cannot add products.
- Cannot edit pricing or discounts.
- Cannot upload inventory.
- Cannot dispatch products.

- Cannot delete or clear inventory.
- Cannot modify any records.
- View-only access.

4. Product Management Module

- Admin adds all company products to a master product list.
- The company produces different products, not only yoghurt.
- Production Manager selects products from dropdown list during upload.
- Fields include Product Name, Category, SKU/Code, Size/Volume, Packaging Type, Unit of Measurement.

5. Production Manager Module

- Upload produced inventory.
- Enter quantity produced, batch number, production date, expiry date, and remarks.
- Can edit unverified uploads only.
- Cannot view pricing, discounts, outstanding balances, or financial reports.

6. Store Manager Module

- Verify inventory uploaded by Production Manager.
- Dispatch products to distributors/customers.
- Can only see product quantities and stock movement.
- Cannot view pricing, discounts, revenue, or outstanding balances.

7. Distributor Module

- View products received.
- View assigned pricing and discounts.
- View invoices, payment history, and balances.
- Cannot modify inventory or pricing.

8. Notification System

- Production upload notifies Store Manager, Super Admin, and General Managers.
- Inventory verification notifies Super Admin and General Managers.
- Dispatch completion notifies Super Admin, General Managers, and Distributor.
- Inventory deletion immediately notifies Super Admin and General Managers.

9. Inventory Deletion & Clearance Policy

- Only authorized personnel can clear inventory.
- Before deletion, system must force report download (PDF/Excel).
- A copy of deleted inventory automatically sent to Super Admin.
- Deleted records remain in Deleted Inventory Log/Audit Trail.
- Audit log must contain user name, deleted items, reason, date, and time.

10. Workflow

- Super Admin creates products, managers, distributors, pricing, and discounts.
- Production Manager uploads inventory.
- Store Manager verifies inventory.
- Store Manager dispatches products.
- System sends notifications automatically.
- Audit logs maintain accountability.
